DIVERSION™

Easy-to-understand operator interface.

1. Power-up
2. Select material type
3. Set material thickness range—then weld! It's as easy as 1, 2, 3.

Inverter-based, AC/DC power source provides a more consistent welding arc while using less power.

Fan-On-Demand™ power source cooling system operates only when needed, reducing noise, energy use and the amount of contaminants pulled through the machine.

High frequency arc starting provides non-contact arc initiation that reduces tungsten and material contamination.

Auto-postflow adjusts the length of postflow time based on the amperage setting, shielding your tungsten and eliminating the need to set the postflow time.

Diversion 165

Diversion 180

Portable. Whether it's in the shop, garage or at the race track, at 50 pounds they can be taken anywhere.

Advanced squarewave AC provides a fast freezing weld puddle and deeper penetration.
